## **SOCCER GOAL SAFETY AND EDUCATION PROCEDURE**

### **Attachment 1**

#### **Procedures For Safely Securing Movable Soccer Goals**

According to the U.S. Consumer Product Safety Commission (CPSC), a properly anchored counter-weighted movable soccer goal is much less likely to tip over. Accordingly, it is **IMPERATIVE** that ALL movable soccer goals are always anchored properly and that they are secured to the ground (preferably at the rear of the goal), making sure the anchors are flush with the ground and clearly visible.

There are several different ways to secure a Movable Soccer Goal. The number and type of anchors to be used will depend on a number of factors, such as soil type, soil moisture content, and total goal weight. Each goal shall be secured in accordance with the appropriate anchoring system as set forth below.

In addition, warning labels required by the District's Soccer Goal Safety and Education Procedure will be attached to each goal. Nets shall be secured to posts, crossbars, and backdrops with appropriately supplied ~~hooks~~ hardware attached to the goals.

#### **Anchor Type Used by Palos 118:**

##### **~~Peg or Stake style (varying lengths) Anchor~~**

~~Typically two to four pegs or stakes are used per goal (more for heavier goals). The normal length of a peg or stake is approximately 24 inches. Care should be taken when installing pegs or stakes. Pegs or stakes should be driven into the ground with a sledge hammer as far as possible and at an angle if possible, through available holes in the ground shoes (bar) and rear ground shoe (bar) to secure them to the ground. If the peg or stake is not flush with the ground, it should be clearly visible to persons playing near the soccer goal. Stakes with larger diameters or textured surfaces have greater holding capacity.~~

##### **Auger Style**

This style anchor is "helical" shaped and is screwed into the ground. A flange is positioned over the ground shoes (bar) and rear ground shoe (bar) to secure them to the ground. A minimum of two auger-style anchors (one on each side of the goal) are recommended. More may be required, depending on the manufacturer's specifications, the weight of the goal, and soil conditions.

## **SOCCER GOAL SAFETY AND EDUCATION PROCEDURE**

### **Attachment 2**

#### **Permitted Users Safety and Education Procedures**

##### **All parents and guardians of soccer players:**

One of our primary objectives is that children have safe recreation areas. To that end, soccer goals should remain securely anchored to the ground and nets firmly attached to the goals.

In an effort to keep the goals and nets secure and children safe, you are required to advise your children/soccer players and any other person accompanying you for whom you are responsible that the following is strictly prohibited: moving any soccer goals and any use of a soccer goal that is inconsistent with soccer-related activity, including without limitation, playing, climbing, or hanging on any part of the soccer goal and attached net. This especially applies to children climbing on or hanging from nets or goal frames. According to the U.S. Consumer Product Safety Commission, these activities can result in serious injury, including death.

If you observe any child inappropriately using a soccer goal or net, immediately and politely ask the child to stop. If the activity continues, please notify a coach or referee as soon as possible. Players violating this rule may be forced to sit out, at the coach's discretion.

Finally, if you see any soccer goal that is not anchored down or any net that is not firmly secured to the goal, please notify a coach or referee immediately. If you have any questions or concerns please contact Palos 118 at 708-448-4800.

Sincerely,

Palos 118
